Reviews

*Here is the finest publication we have read right up until now. It is actually writter in easy words instead of difficult to understand. Its been written in an remarkably easy way in fact it is only right after i finished reading this book in which basically changed me, modify the way i really believe.

OCLC Number: (OCoLC)48059480 Subject: Environmental monitoring -- Technological innovations -- United States. Excerpt: . . . Chapter 1: Introduction Chapter 1: Introduction Sewage treatment plants, power generation plants, chemical manufacturers, and pulp and paper mills are among the facilities that emit or discharge various pollutants into the air and water. Urban development and agriculture also contribute pollutants to our environment, although often in a much more diffused manner (see fig. 1.) Pollutants from all of these facilities and activities can pose serious threats to human health - sometimes immediately upon contact when encountered in sufficient quantities; other times through long-term exposure to smaller quantities. Many pollutants also damage wildlife and other natural resources, and degrade overall environmental conditions. The primary purpose of the Clean Air Act and the Clean Water Act is to regulate emissions of these pollutants.
