A very wonderful book with lucid and perfect answers. It is probably the most incredible book i have study. Its been designed in an exceptionally simple way and is particularly just after i finished reading through this publication by which in fact transformed me, alter the way in my opinion.

TOMO V TRATADOS PHYSICOS Y MEDICOS DE LOS TEMBLORES Y OTROS MOVIMIENTOS DE LA TIERRA, LLAMADOS VULGARMENTE TERREMOTOS .

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Original publisher: Reston, Va. : U. S. Geological Survey, 2008. OCLC Number: (OCoLC)191957277 Subject: Pavements -- Earthquake effects -- California -- Santa Clara Valley (Santa Clara County). Excerpt: . . . 120 circle radius 100 meter 40080 per number 60 damage, 40 of Concentration 20 0 100 350 600 850 1100 1350 1600 1850 2100 Distance across feature, meters Figure 9. Circles are values from the density map taken along a cross-section. Black line is a gaussian curve (mean 1100, standard deviation 250) fit to the data. Note that the gaussian curve fits the data well to two standard deviations, indicating damage in this area forms a cluster, and little effect is seen beyond two standard deviations (grey vertical lines). 2 within the town of Los Gatos and a radius of about 500 m. There are 310 points within this area, and they seem to be attributable exclusively to the cluster, with little effect seen outside the models radius. The 310 points within a 500 m radius of the center of the modeled cluster were removed, generating a dataset referred to for the remainder of this paper as the declustered dataset. The density plot of the declustered dataset is shown in figure 8 (bottom). The resulting dataset should be free of the effect of the dramatic clustering in the town of Los Gatos. However, it is possible that the clustering and the linear concentrations of damage are related to the same process as the lineaments, and that using the declustered dataset will reduce the sample size and introduce some bias. Since the nature of the cluster is not clear, both the original dataset and the declustered dataset will be examined...
