The work consisted in condensing the exhalations from the lungs, injecting the liquid thus obtained into guinea pigs and, after a suitable incubation period of two weeks or more, testing the guinea pigs to see if they had become sensitized by the injected condensed breath. Since the guinea pigs reacted to the injections, Rosenau and Amoss concluded that the animals were sensitized with a substance of human origin, protein in character, and further that the protein was volatile in nature. As the anaphylaxis reaction is extremely delicate, revealing the presence of so minute a quantity as one millionth of a cubic centimeter of blood serum, it is much more delicate than any chemical test. Further, the anaphylaxis reaction...
