Dimensional Analysis of Food Processes (Hardback)

By Guillaume Delaplace, Karine Loubière, Fabrice Ducept

ISTE Press Ltd - Elsevier Inc, United Kingdom, 2015. Hardback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book. This book deals with the modeling of food processing using dimensional analysis. When coupled to experiments and to the theory of similarity, dimensional analysis is indeed a generic, powerful and rigorous tool making it possible to understand and model complex processes for design, scale-up and /or optimization purposes. This book presents the theoretical basis of dimensional analysis with a step by step detail of the framework for applying dimensional analysis, with chapters respectively dedicated to the extension of dimensional analysis to changing physical properties and to the use of dimensional analysis as a tool for scaling-up processes. It includes several original examples issued from the research works of the authors in the food engineering field, illustrating the conceptual approaches presented and strengthen the teaching of all. * Discusses popular dimensional analysis for knowledge and scaling-up tools with detailed case studies* Emphasises the processes dealing with complex materials of a multiphase nature* Introduces the concept of chemical or material similarity and a framework for analysis of the functional forms of the property.

Reviews

The book is simple in read through better to fully grasp. It is rally exciting throgh looking at period of time. I discovered this publication from my i and dad encouraged this book to find out.

-- **Dr. Dillon Monahan**

This book is fantastic. It really is packed with wisdom and knowledge I am pleased to explain how this is the greatest ebook i actually have go through in my personal daily life and can be he greatest ebook for at any time.
