Greenleaf Publishing. Hardback. Book Condition: new. BRAND NEW, Sustainable Resource Management: Global Trends, Visions and Policies, Stefan Bringezu, Raymond Bleischwitz, Sustainable Resource Management is the result of years of exhaustive research by Germany's Wuppertal Institute. Looking at material flows, industrial and societal metabolism and their implications for the economy, this important new book provides radical perspectives on how the global economy should use natural resources in intelligent ways that maximise well-being without destroying life-supporting ecosystems. It presents a vision of the future and the fundamental elements necessary for the sustainable management of the Earth's resources. It argues that the need to manage the use of our natural resources at a sustainable level can be shaped into a great opportunity for innovation and for new institutions to govern change. Sustainable Resource Management first provides an overview of the methods it has used to analyse the physical basis of our economies, from the product and firm level through to sectors and whole countries, considering material flows and life-cycle-wide impacts on the environment. Indicators are described that reflect the volume, structure and physical growth of the socio-industrial metabolism, resource productivity and the share of domestic and foreign resource use. By accounting for the global land use of different countries and regions, the book aims to better assess the global implications of domestic activities. For example, linkages are made between the consumption of food and non-food to land use change, such as the expansion of cropland at the expense of natural ecosystems. Sustainable Resource Management presents a number of key findings. Comparing the resource use of the EU with the USA, Japan and China, it determines why there is a difference. It provides evidence about the decoupling of resource use from economic growth, at the expense of an increased reliance on foreign supply. There...
