Createspace, United States, 2012. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.Approximately 95 percent of the world s trade moves by containers, primarily on large ships, but also on trains, trucks, and barges. The system is efficient and economical, but vulnerable. Until recently, theft and misuse have been as accepted as a cost of doing business. However, the rise of terrorism and the possibility that a container could be used to transport or actually be the delivery vehicle for weapons of mass destruction (WMD) or high explosives have made it imperative that the security of the shipping container system be greatly improved. Aside from the direct effects of an attack, the economic, social, and political consequences of a significant disruption in the transport chain would be staggering. In response to recent terrorist attacks the United States, the European Union, and international organizations and industry have instituted new measures to improve security in the shipping trade, including some procedures on containers. These include bilateral agreements involved in the Container Security Initiative (CSI) and the Proliferation Security Initiative (PSI). These measures are useful, but shipping containers remain vulnerable. The authors, building on work done by the National Defense University Center for Technology and National Security Policy that formed the basis for the CSI, recommend a comprehensive multilateral agreement on the use of containers in international trade rather than numerous bilateral agreements. Such a comprehensive solution requires a worldwide approach, including improved tools, better information, and cooperation among all stakeholders. Key components of the system that need improving include th e bill of lading, seals, controls and sensors at borders, ports, and other transfer points, and the verification and sharing of information. The key objective must be to verify more reliably the...
